

# MULTI-ENZYME ICE MACHINE CLEANER

ONE-STEP ICE MACHINE CLEANER

## CLEANER ICE MACHINES IMPROVE HEALTH STANDARDS, ENERGY EFFICIENCY AND REDUCE COSTS

With ice being defined as food, very strict food safety regulations apply to the hygiene standards of ice machines. In many countries, contaminated ice machines can lead to large fines.\*

### PRODUCT OVERVIEW

Cleans and removes organic debris by detaching it from surfaces so particulates can be easily rinsed.

The **AerisGUARD™ Ice Machine Cleaner** is a patented one-step cleaning product with a multi-enzymatic formulation that is designed to be the best practice application for the cleaning of ice machines.

The cleaner breaks down organic debris in a single process.

Contamination is then readily flushed from the ice machine during final rinsing.

**AerisGUARD Ice Machine Cleaner is pH neutral and provides:**

- Reduced risk of ice contamination as organic debris detachment is known to spread dislodged contaminants to the contents of the ice machine
- Helps increase asset life due to non-corrosive nature of the product
- Safer to use

## FEATURES

- Non-corrosive, multi-enzyme formula
- Safe on all metals
- pH neutral
- Highly concentrated mixed at 50:1 ratio
- HACCP and NSF certified
- pH neutral

## BENEFITS

- Reduces risk of dirty ice as detached particulates are rinsed away
- Helps extend asset life due to non-corrosive formula
- Safer cleaning process

## DIRECTIONS FOR USE:

- Pump must be in operation but refrigeration cycle should be off
- Once ice is removed, add AerisGUARD Ice Machine Cleaner directly into the water tank (1:50 dilution). For best results use warm-to-hot water (45°C - 65°C) for dilution
- Turn on wash mode and leave for 30 minutes
- Drain the water tank
- Repeat process with fresh water to flush the system
- After unit is thoroughly rinsed, switch unit back to "Ice" mode
