

# Hygiene Services cold storage

# Aeris Hygiene Services offers the only complete solution for coolroom sanitisation and remediation treatment.

## The Problem

Coolrooms continuously recirculate unfiltered air. This exposes the coil to high levels of contamination.

This results in impaired system performance

- Reduced airflow
- Temperature fluctuations
- Units struggling to maintain desired operating environment

Other problems include:

- Poor odour control
- Corrosion of coil and surrounds

If left untreated, serious health risks can result.

## The Proof

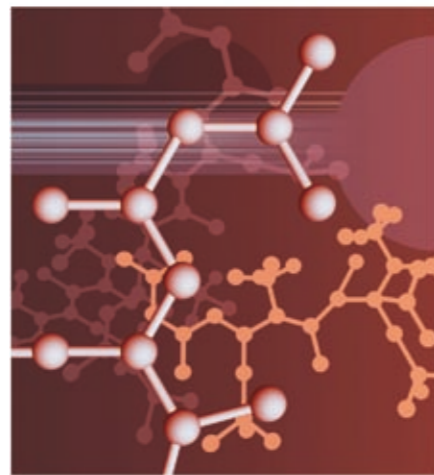

Before

After

## The Technology

AerisGuard cold storage products are a patented combination of multi-enzymes (for the removal of biofilm) and biocides impregnated into slow release polymers (providing 6 month residual protection from continuous microbial growth) which protect your cool room assets from microbial degradation.

*“We have noticed a large reduction in the time it takes for the rooms to bring produce down to temperature, and there is much more airflow around the room. We have also noticed that the rooms smell and look much cleaner.”*

*Joe Cremona, Managing Director,  
Cremona Bros Pty Ltd  
Fruit Merchant & Agent,  
Sydney Markets*

## The Aeris Hygiene Solution

### FDC - Clean and Treat service

- ✓ Pre-clean unit inspection

- ✓ “Clean and Treat” service

- ✓ Post-clean Quality Assurance inspection

### Cool Room - Clean and Treat service

- ✓ “Sanitisation” service - floor, wall and ceiling antimicrobial spray treatment
- ✓ “Disinfection” service - floor, wall and ceiling residual protection spray treatment

# Aeris Hygiene Services Quality Policy

Aeris Hygiene Services vision is to be the leader in remediation of biofilm and ongoing protection of Cool rooms. Aeris Hygiene Services will use the ISO 9001:2000 Quality Assurance system which incorporates HACCP principles for food safety and traceability, to hygienically clean and protect all modern air handling components, primarily the coils, drain pans and related surfaces.

The constant review, plus benchmarks and accountability, will ensure customer satisfaction through effective application of the AerisGuard and ISO quality systems. Aeris Hygiene Services will constantly re-inforce quality objectives to management and staff, will provide ongoing education and training and will encourage ongoing contributions by staff to continually improve quality management systems.

Our quality management system will ensure Aeris Hygiene Services continues as a leading supplier of quality hygiene services for the Cold Storage Industry.
